

## SAHS Math Review Sites

Tips for how to learn and study math can be found at:

<http://tutorial.math.lamar.edu/Extras/StudyMath/HowToStudyMath.aspx>

For help with a Texas Instruments graphing calculator:

<http://math.escweb.net/Calculator/intro.htm>

For homework help, Khan Academy and Brightstorm offer excellent online assistance. Just match the topic you are studying (or have studied) in class with the title of the tutoring video on each of the web sites. For Wolfram Alpha, just type in the math problem and it will solve it.

[www.khanacademy.org](http://www.khanacademy.org)

Each video is approximately 5 to 10 minutes long. There is a smartphone / iPad app for Khan Academy.

<http://www.brightstorm.com/math/>

Like Khan Academy, except you see the teacher.

[www.wolframalpha.com](http://www.wolframalpha.com)

If you type a math problem into Wolfram Alpha, it will give you the answer. It will also show the steps used to solve the problem and provide graphs.

Other subject specific power point presentations, note sheets, and practice examples can be found on the Google websites of mathematics teachers at SAHS. The pages below list all teacher websites at SAHS.
